

# QX SPORT INSPIRATION DESIGN CUES

Infiniti models give expression to a unique design philosophy, known as 'Powerful Elegance', characterized by many of the brand's design hallmarks: a distinctive face; bodyside surfacing; a 'crescent-cut' pillar; and a fluid rear aspect. With the daring new QX Sport Inspiration, 'Powerful Elegance' has taken another step forward.

## DISTINCTIVE FACE

The double-arch grille on QX Sport Inspiration extends through the sharp, high-performance, focused 'human-eye' headlamps around the edge of the hood to form a character line that runs over the wide, flared front wheel arches and along the flanks to the tapered rear.

## BODYSIDE SURFACING

Infiniti's bodyside surfacing is characterized by flowing, sculptural lines and taut, muscular forms. The short overhangs and athletic haunches of the QX Sport Inspiration endow the car with a purposeful aura that hints at its dynamic capability.

## CRESCENT-CUT PILLAR

The QX Sport Inspiration features a new interpretation of Infiniti's unique crescent-cut pillar, within which the leading edge of the crescent is raised and given a more angular look to highlight the car's inherent agility.

## STRIKING REAR

Infiniti's 'Powerful Elegance' form language extends subtly to the rear of the QX Sport Inspiration. The feature lines merge with the 'blade'-shaped tail-lamps, reinforcing the feeling of a holistic approach to design that considers every detail, while keeping the overall form in mind.
